

**HOME OWNERS
BUYERS GUIDE:**

OUTDOOR HEATING

Outdoor heating is becoming increasingly more popular and affordable with a variety of options.

This guide will help lead you through the different:

- Fuel Sources
- Styles
- Features
- Heat Ranges

to help you determine the ideal heater for your lifestyle and outdoor environment.

DGR Series
Outdoor Infrared Portable Propane Heater

DIRP Series
Outdoor/Indoor Wall-mount Infrared Heater

What type of fuel source is right for you?

Natural Gas

Natural gas heaters offer a more permanent solution for outdoor comfort since they are hooked up to a gas line by a professional. The result is maintenance-free, endless fuel supply.

Propane Gas

Propane gas heaters are portable, easy to install using a propane tank, and require some maintenance due to replacing the tank. They offer the most flexibility.

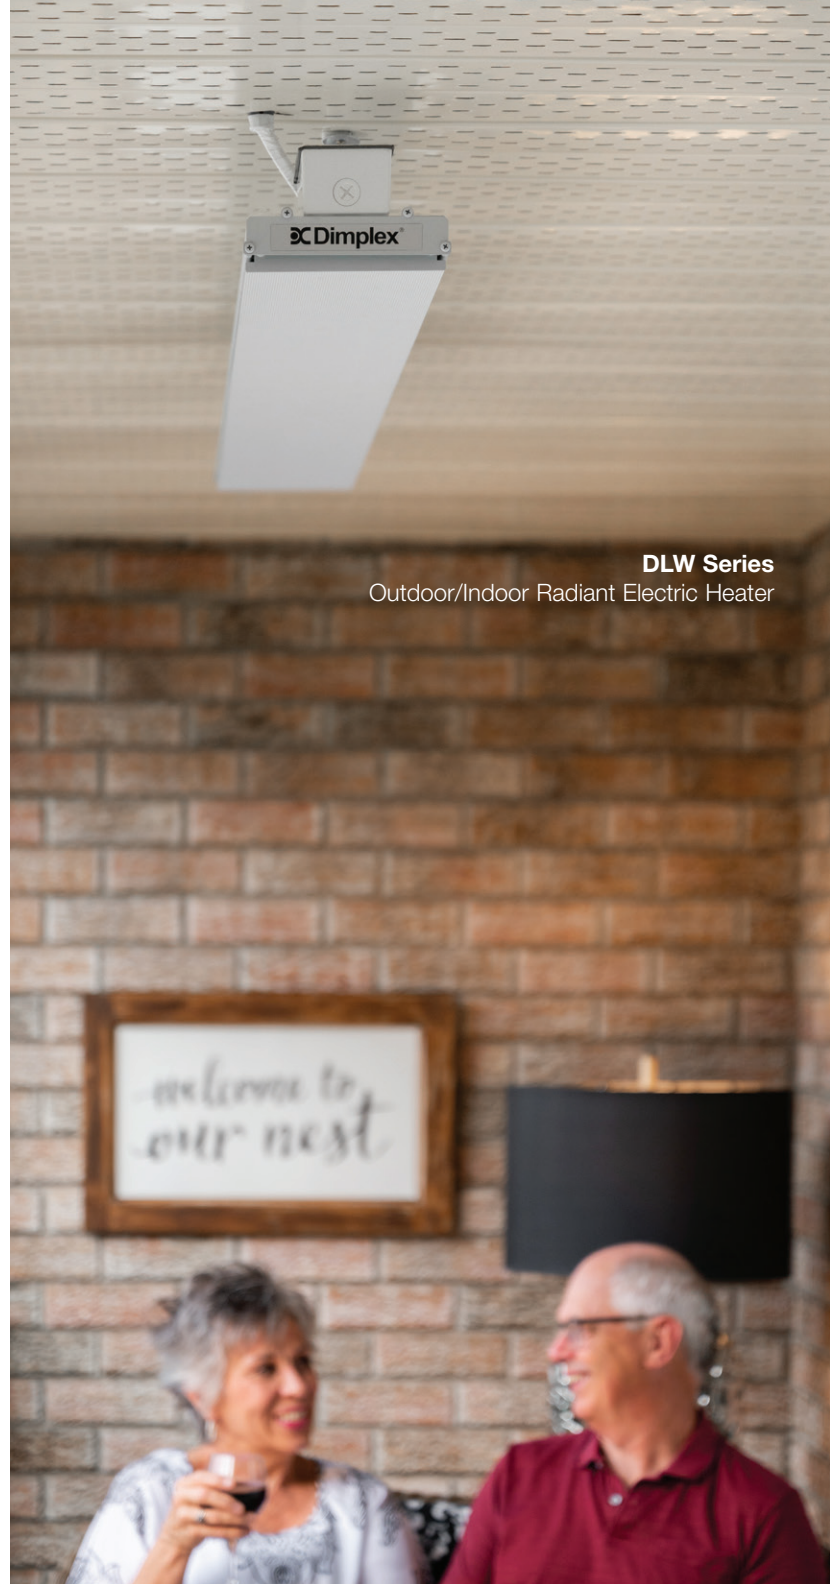

Infrared Electric

Electric heaters are the fastest to heat up, come as plug-in and portable, or fixed and hardwired and may require a professional to install. They are the most environmentally friendly with zero-emissions.

Hanging or Suspended Outdoor Heaters

Hanging or suspended heaters are often installed from ceilings and designed for areas with limited space. They are great for covered porches, patios, gazebos or workshops. Often they are electrically powered and can be controlled with a thermostat.

DLW Series
Outdoor/Indoor Radiant Electric Heater

Mounted Outdoor Heaters

DSH Series
Outdoor/Indoor Electric Infrared Heater

Likely the most common style for outdoor heaters, and most versatile for fuel sources offering natural gas or electric options. While install requires a professional, the heat output is greater, and often has more options for comfort with variable heat.

Look for models with auto-shutoff for safety.

Portable Outdoor Heaters

Portable or free standing heaters are often propane or electric sourced. Often, they will hide the propane tank and are excellent for moving between multiple entertaining spaces. Look for models with wheels and safety straps to make mobility easier.

DGR Series
Outdoor Infrared Portable Propane Heater

Features to look for in an outdoor heater

To keep our family and guests safe, look for these minimum features in your outdoor heater:

- Auto-timer shutoff or auto-safety shutoff
- Safety certified
- Tip-over switch on portable models

Some convenient features:

- Wheels if portable
- Remote control
- Multi heat settings
- Thermostat compatible for fixed units

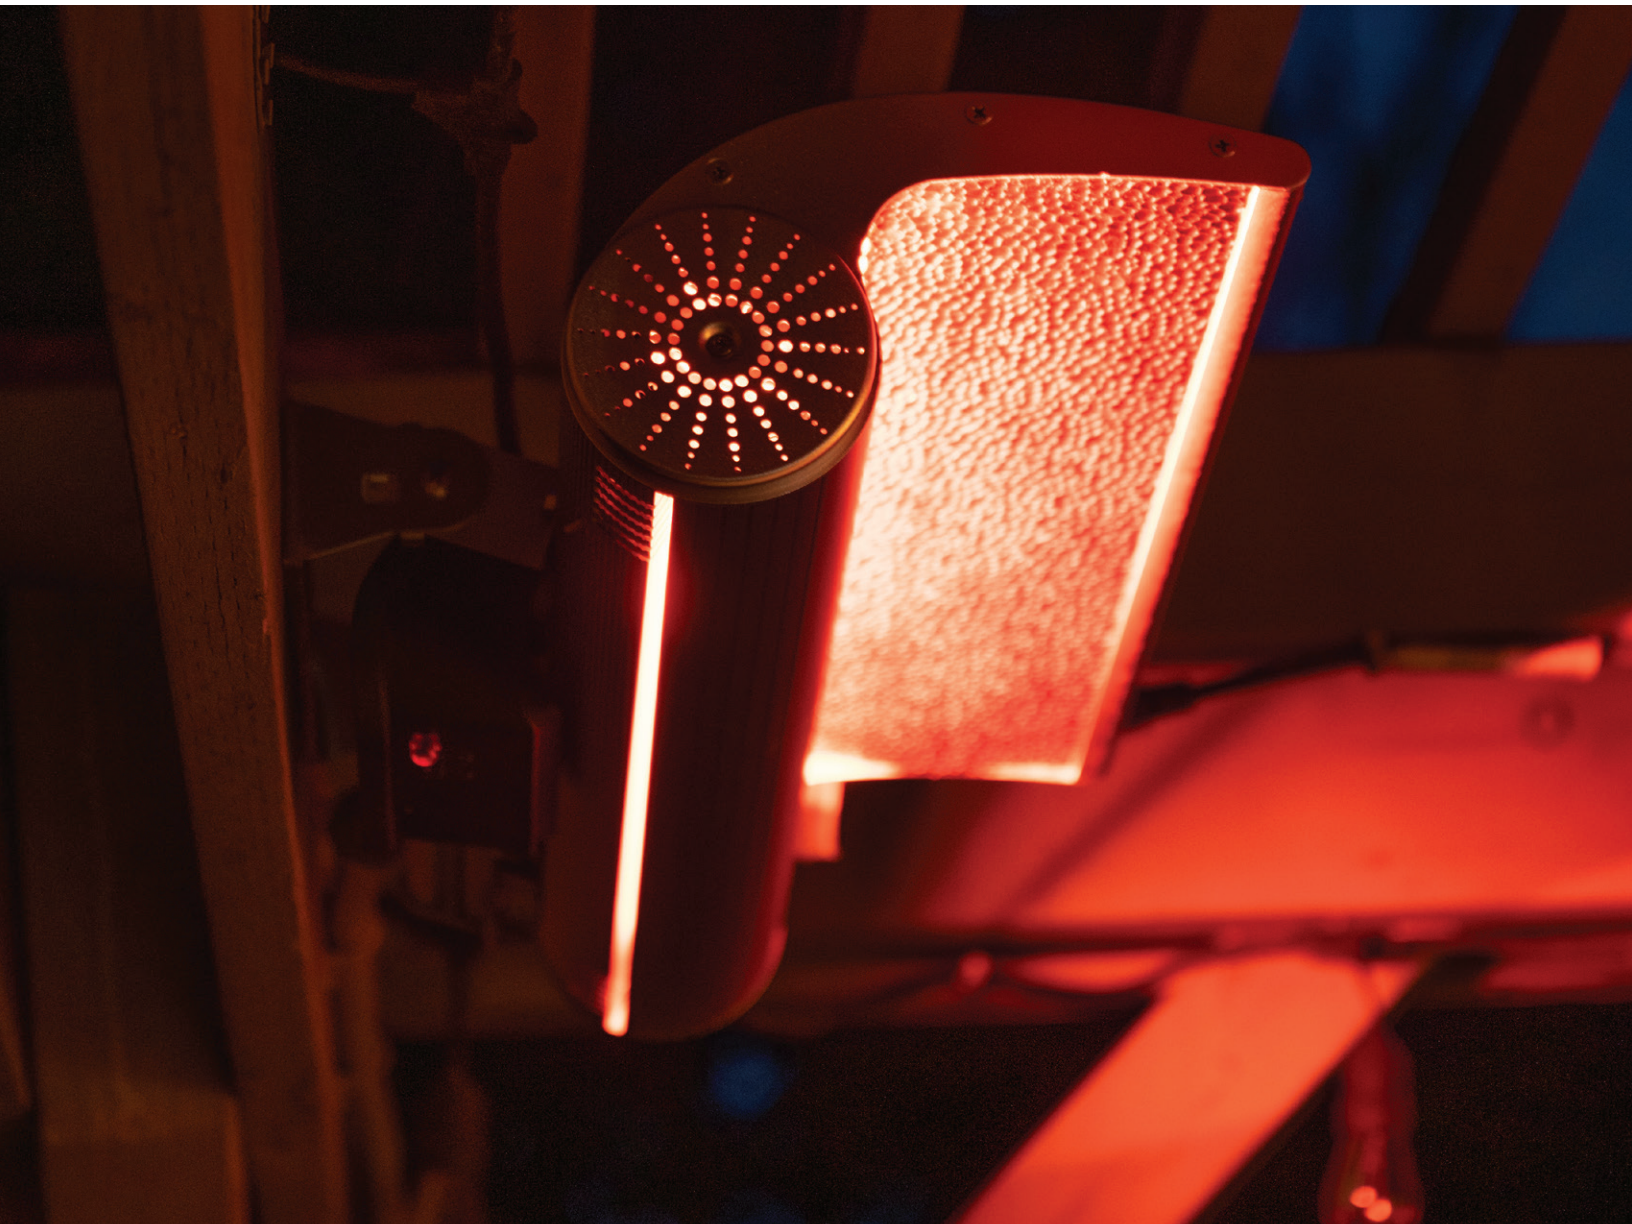

DGR Series
Outdoor Wall-mounted Infrared Natural Gas Heater

What size do you need for your outdoor space?

Area in Square Feet (sq. ft.)	Suggested BTUs
100 - 150 sq. ft.	5,000
150 - 200 sq. ft.	6,000
