

Outdoor Wall-mounted Infrared Natural Gas Heater

DGR Series

Powerful and space-saving.
Heat when and where you need it.

Sleek and powerful, our Outdoor Infrared Heaters can enhance any patio space instantly to give you heat on demand. The stylish black DGR model is a luxury upgrade in outdoor spaces with a natural gas line installation and permanent wall mount. Made of durable stainless steel and equipped with a high-performance ceramic burner that can deliver up to 31,500 BTUs per hour. Extend your living space into your backyard all year round.

Outdoor Wall-mounted Natural Gas Infrared Heater

DGR Series

Features

Perfect Fit

Extend your outdoor living and dining season year round—patios, balconies, gazebos, common areas, restaurants

Powerful Heating

Commercial grade 4-tile ceramic burner produces 31,500 BTUs of heat

Flexible Installation Options

Wall mount using the included bracket and select your desired angle, or suspend from the ceiling—direct heat where it is needed

Heat on Demand

Warm outdoor commercial and residential areas up to 172.2 sq. ft. (16 m²) with just one heater

Innovative Design

No electricity or hard wiring required, works independently with a natural gas line

Superior Construction

Constructed of 430 stainless steel and coated with a high temperature paint, the DGR offers world-class wind protection up to 9.9 mph (16 km/hr.)

Advanced Safety

Protective grille and reflector contain flames and keep the surrounding surfaces cool

Simple Operation

Electronic finger pull makes for safe, easy ignition and turn off

4-tile commercial ceramic burner

Wall bracket and gas regulator included

Electronic finger pull

Protective grille and reflector included

DGRPOLE-WM
Suspend your heater from the ceiling

DGRSHIELD
Low clearance heat shield allows for 12" (30.5 cm) overhead clearance
