- B. Touch-up, repair or replace damaged products before Substantial Completion.

## **Product Dimensions:**

## Framing / Installation:

**NOTE:** Two people are required for installation.

Prepare a wall with a framed opening, following the dimensions shown in Figure 3. The fireplace can either be installed partially-recessed (2"x4" frame) or flush-mounted (2"x6" frame).

**CAUTION:** Decorative finishing material (such as brick) should be limited to ½" (13 mm) overhang to ensure adequate flow of heated air out of the firebox area.

**A** CAUTION: This fireplace is NOT load-bearing. Ensure the opening for the fireplace is framed in such a way that the weight of the building materials will not create pressure on the top of the fireplace.

NOTE: For 2"x4" construction where the unit will be partially recessed, it is recommended to use XLFTRIM kit (sold separately) to accomodate the protruding portion of the fireplace.

**NOTE:** Wiring entry is located on the right side at the bottom of the firebox. Plan the framing to allow routing of the power cable to this location.
